DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 40 is rejected under 35 U.S.C. 102(b) as being anticipated by Gammie(5,029,207).

With regards to claim 40, Gammie teaches a method for communicating among nodes in a network of communication nodes, the method comprising: communicating a descrambling key to selected nodes in a network (descrambling key or Key of the month); selecting a seed mask(seed memory contains seed); generating a first scrambling algorithm from the seed mask(inherently taught because the seed is used for scrambling the audio and video communications) ; scrambling a communication in the network using the first scrambling algorithm(col. 7 lines 3-4); and descrambling the communication at the selected nodes, in

response to receiving the descrambling key(key of the month used to descramble signal)

Allowable Subject Matter

Claims 2-38 allowed.

Claim 41 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth N Vanderpuye whose telephone number is 703-308-7828. The examiner can normally be reached on M-F(7:30-5:00) Second Friday Off.
